**New interesting science & Cross-disciplinary
partnerships**

I am very excited about the Multidisciplinary topics and

discussions about different urgent problems in paediatric intensive care practice.

Awesome for Early-career professionals!

Very instructional for beginners/resident like myself! All kidney related talks were of very high quality. I learned a lot!

Great practical application

I learned new information about companies, products, clinical research, which I am certain will be of great value to me in my present job, and future practice.

I love networking at the ESPNIC congresses!

There were very good opportunities for networking & collaboration with colleagues from around the world!

Cutting-edge science!

Excellent high-quality scientific and educational content from top professionals in our field!
