

EMERGENCY EVACUATION PLAN MEGARON ATHENS INTERNATIONAL CONFERENCE CENTRE

The Megaron Athens International Conference Centre (MAICC) recognizes that it has a responsibility to the health and safety of all persons visiting the venue. In support of this, a comprehensive emergency plan has been implemented to ensure the safety and well being of all the MAICC guests.

The building complies with, and in many aspects exceeds all current statutory requirements in the area of provision for emergencies. The building is equipped with automatic sprinklers, smoke detectors and red fire push-button systems in all areas. These areas have a direct link to the MAICC Control Room which is manned 24 hours a day, 365 days a year.

An Emergency Control Organisation (ECO) has been established to deal with all emergency incidents that may affect the safety and well being of all building occupants. All ECO personnel consist of in-house employees and in the event of an emergency it is requested that everyone follow the directions of the MAICC staff.

All visitors to the MAICC are requested to familiarize themselves with the emergency exits, the assembly area located close to their immediate area and to be conversant with the general emergency evacuation procedure.

Any further enquiries should be directed towards the MAICC staff.
